

**NICOLE JAIMES**

Parent

For ten years, it's been my privilege to live and raise my four beautiful children in Garden Grove.

As a stay-at-home mom, my focus and priority has been to immerse myself into my children's educational success.

Two of my children are special educational needs students, and like other parents in the district, we require better management of this program, making it easier for parents to access much needed resources.

Our school district works toward positive outcomes for our children, but we must do more to raise our standards of success.

Require: Our district to expand our diverse language classes.

Promote: New curriculum, home economics, woodwork, and auto shop for non-university bound students.

Protect: Our children's security on campus, along with promoting strong mental health programs, as top priorities for our schools.

Our 2019 state testing scores shows 60% of our students pass ELA and only 50% pass proficiency tests in math .

We need to get back to core policies and do better:

Promote vocational/technical education

Create Partnerships with local business interests.

Support Dual Immersion to repair and expand our present language programs

Keep our schools safe and secure.

Thank you for your vote November 8th

Nicole Jaimes
